

*Dear Mums and Dads to be,  
we offer a modern maternity unit where you can have your baby delivered  
in the centre of Prague*

**University Hospital Královské Vinohrady**

Šrobárova 1150/50, 100 34 Prague 10  
Prenatal clinic – tel. 267162 906

Our maternity unit is a small, family-friendly facility. We pride ourselves on the welcoming approach of our doctors and nurses and we aim to accommodate the wishes (birth plans) of parents. The presence of the father or a doula at childbirth, bonding, minimal separation and maximum support for breastfeeding are routine parts of our care.

You can have an interpreter present at the birth and in the post-natal department.

We have newly renovated delivery rooms and a neonatal unit with fully up to date equipment.

Our newly built intensive care unit for newborns is ready to treat babies with congenital defects (e.g. a cleft lip). We provide comprehensive care for premature babies from the 32nd week.

**If you are interested, you can take various courses with us:**

- Individual or group prenatal courses
- Prenatal course in English
- Training for the post-natal period and childcare
- Advice on managing breast milk

There is no need to register for childbirth in advance but you can do so on a voluntary basis through the hospital website:

**<https://objednavky.fnkv.cz/objednavka2.php?ID=335>**

In case of interest, you can visit our maternity unit, where we will be happy to provide further information and answer all your questions.

A short clip of our delivery room:
